IMDB MOVIE ANALYSIS

PROJECT DESCRIPTION:--

IMBD is well known movie and series rating site for users and critics worldwide. The dataset provided is related to IMDB Movies. A potential problem to investigate could be: "What factors influence the success of a movie on IMDB?" Here, success can be defined by high IMDB ratings. The impact of this problem is significant for movie producers, directors, and investors who want to understand what makes a movie successful to make informed decisions in their future projects.

Data Cleaning: This step involves preprocessing the data to make it suitable for analysis. It includes handling missing values, removing duplicates, converting data types if necessary, and possibly feature engineering.

Data Analysis: Here, you'll explore the data to understand the relationships between different variables. You might look at the correlation between movie ratings and other factors like genre, director, budget, etc. You might also want to consider the year of release, the actors involved, and other relevant factors.

APPROACH:---

FILE IMPORTING ...

Imported the excel worksheet into my MS EXCEL given by the Product Manager using MICROSOFT 365.

EXTRACTION OF INSIGHTS ...

After importing the file required insights are generated using Excel function in MS EXCEL.

TECH-STACKED USED:---

Used MS EXCEL to find the insights from the given data and draw the suitable graph from it and also used

MS PowerPoint for the Presentation.

INSIGHTS:---

- > DATA CLEANING...
- ✓ Removed Duplicates.
- ✓ Removed irrelevant column .
- ✓ Removed empty rows as per the demand of question.
- ✓ Putting the value in some missing data as per the demand of problem.
